

Ride-On Ride-On[®]

Tire Protection System

ATV & Off-Road Formula[™]

Professionally Tested, Race Proven![™]

Ride-On ATV and Off-Road[™] Formula is designed for ATVs and off-the-road vehicles that require extra protection in extreme operating conditions. The ATV formula was designed to provide superior sealing capabilities in tubeless tires that operate at a wide range of operating pressures. The ATV formula offers effective protection against punctures from objects up to 1/4" in diameter. It is ideal for ATVs, UTVs, skid-steers, landscaping, agri, and other off-road vehicles. The ATV formula helps eliminate bead leaks, conditions casings, and extends tire life by helping tires maintain their pressure and run cooler.

Features

- **Reduces downtime:** Prevents flats and seals multiple punctures up to 1/4" in diameter in the contact patch of the tire. Helps seal slow leaks that cause tires to deflate over time.
- **Will not harm tires and wheels:** Ride-On is a **Green** biodegradable product that contains corrosion inhibitors that protect all alloys of steel, aluminum, magnesium, and yellow metals against oxidation.
- **Water dispersible:** Washes out with plain water leaving no residue. **Ride-On ATV** formula will not interfere with the application of tire plug and patch repairs.
- **Suitable for all weather conditions:** Specially formulated to prevent freezing at extremely low temperatures (-40 °F) and separation at high temperatures. (+121 °C)
- Also available in convenient 32-oz. bottles.
