Mr. Mark Farkhan
Inovex Industries, Inc.
45681 Oakbrook Court, Unit 102
Sterling, VA 20166

Dear Mark:

I would like to take the opportunity to let you know how happy we are with your Ride-On product. Tom Kraemer Inc. has been in the demolition hauling and demolition landfill business for over 55 years. As anyone in the business of waste hauling and landfill operations knows, flat tires and slow leaks are a major cost item and our primary source of downtime.

For years we have been searching for a product that could help reduce our flat tires. We saw an advertisement for Ride-On in the Waste Age magazine and decided to give you a call. Well am I glad that we did !

We have now been using Ride-On in all of our rolloff and garbage trucks for over 14 months with excellent results. Since implementing your product, we have reduced our number of flat tires by close to 90%, from more than 2 to 3 a week to one to two every 2 months.

More importantly, Ride-On has virtually eliminated our slow leak problems. Slow leaks are often more difficult to locate and result in the premature removal of a tire for service. We have also noticed that the tires that have been treated with Ride-On maintain their pressure longer. Our tire pressure maintenance program now takes much less time.

Your product really works and I would not hesitate to recommend it to any fleet manager who wants to eliminate a major source of downtime and expense-flat tires.

Thank you again,

Keith Massmann
Operations Manager
Tom Kraemer Inc.
